ERNEST KARLSEN
PRIMARY EXAMINER

Applicant's arguments in the response filed October 14, 2004 are found persuasive and claims 21-24 and 47-60 are examined.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: No reference was found anticipating or a combination of references found making obvious a test system for testing an electronic module comprising a base or board moveable from a first position to a second position and having a plurality of coiled spring contacts wherein each coiled spring has a terminal portion configured to engage a terminal contact with a force generated by the coiled spring in combination with a flex circuit, a zero insertion force structure or a test handler.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comments

Claims 21-24 and 47-60 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hartman and Baertsoen et al are cited to show prior art apparatus having zero insertion force for modules.

Any inquiry concerning this communication should be directed to Ernest F. Karlsen at telephone number 571-272-1961.
